

Temtasi TEK MA5202

Shower toilet with integrated mixer

Temtasi[®]
The shower toilet

- Shower toilet with closed flush rim, wash-down with horizontal outlet, concealed supply lines, anti-calcification and anti-bacterial ceramic surface
- suitable for all common pre-wall installation frames
- integrated mixer of chrome plated brass and flat stainless steel ball nozzle, freely adjustable
- Safety Installation-Set with pipe breaker according to EN1717 included
- optional removable WC seat made of Duroplast with soft close

The classically shaped TEMTASI shower toilet "Tek" has an integrated mixer tap offering the maximum comfort on a shower toilet. The user can comfortably and gently regulate both the intensity and the temperature of the water jet. The integrated flat ball head nozzle, which can be adjusted in all directions, is made entirely of stainless steel. This guarantees a particularly long-lasting and hygienic function, so thorough cleaning with disinfectant is also possible. The pipe interrupter required for operation according to EN1717 is included in the scope of delivery as a safety Installation-Set.

The matching toilet seat is optionally available. It is made of Duroplast, has a soft-close function and is removable to allow a particularly hygienic cleaning.
